

Your Vision. Our Expertise.

We specialise in the most comprehensive range of building components, such as Pre-Engineered Building System, Metal Roofing & Cladding System, Insulated Puf Panel & Light Gauge Framing System (LGFS) System in India.

we provide
best services

SUPPLYING, ERECTION AND INSTALLATION

leading the way in faster, stronger and easier construction with the passage of time, concrete, cement and tin sheet are not able to meet the increasing demands of people to have a stronger structure which saves them cost, time and space as well. our panels are built in accordance with the leading edge techniques and are installed using modern yet simplistic methods facilitating efficient assembly and quick installations. customizable, compact, lightweight, strong and weather resistant, these panels are the faster building material ever made and are stronger than any of their contemporaries and competitors. Artifex Infra puf panels are designed with an aim to revolutionize the building industry by providing energy saving and convenient construction solutions at competitive prices.

New Building Code called Energy Conservation Building Code (2007) of Government of India, Ministry of Power requires buildings having connected load over 500KW or above to keep their thermal “U” value at designated levels which can be achieved only with proper insulation of walls and roof.

These levels can be effectively and easily achieved with Artifex Panels. Compliance with these U value helps to achieve massive savings in energy bills by bringing down energy load. Such Energy savings may even result in payback of building cost within 4-5 years.

From energy savings perspective, a building made from Artifex Panels will need 7 times lesser energy to cool when compared with building of same size and shape constructed using 9” brick-work.

We can produce panels with much higher R Value to achieve any desired U value to match requirement of specialized projects including Zero-Energy Buildings, Green Buildings, Cold-storage’s and project requiring compliance with Energy Conservation Building Code of Government of India.

Application

Commercial Application: Artifex Panels are customized to your industrial needs. With its heat insulation attributes, you can keep you guard room cool, enabling him to function more efficiently from his designated space. Being light weight, yet strong, these panels can be easily carried to cover high storage, with minimal labor requirements. Furthermore, as the panels help keep the enclosed space cool, your workers can work without worrying about sweating it out too much and at the same time, you also save money on energy bills. With custom made panels, you can create your own work space as per your existing needs, keeping your interiors warm in winter and cool in summers. Its load bearing capacity makes it an appropriate product for industrial use.

- Factory Shed
- Godown
- Staff Quarters
- Cold Storage
- School Classrooms

Interior Application: Interior panels can be used to provide modern look to your rooms as they can be used as readymade partitions and walls for modern interiors and is easy to shift and move. To render a modern, trendy and unique look to your interiors, install custom made panels that can be used as walls which are also available in various colors, designs and are reliable as well.

- Machine Enclosures
- Clean Rooms
- Office Partitions
- Cold Room

General Application: Apart from industrial or residential applications, panels can be used for general spaces as well. For instance, if you wish to build an outhouse for a guard or servant, a cool dog house for your favorite pooch, an outhouse toilet or an additional storage space, kiosk, shelter space for livestock, etc. Its functionality doesn't change with its size as it still provides shade and cools to the enclosed space and keeps it warm during winters.

- Guard Room
- Toilet Blocks
- Parking and Animal Shelter
- Site Office

Residential Application: Panels are available in different colors, rendering a unique look to your home, apart from providing you with unique applications and functionality. With varied uses, panels can also be used as partition walls, or they can be used to keep a small area in your house, such as a "Puja Room", "Store Room", "Terrace Room", "Dog House", etc. cool as well. As they are custom made and installed easily, you can build your house at a faster pace, making the entire process convenient for you.

- Penthouse
- Farm Houses
- Outhouse
- Kids Play Room
- Servant Room

Features

Faster: Our Panels are custom built from factory itself hence they require very less installation time on site. These panels are also very easy to install thus saving time and cost. Usually, an approximate turnaround time of 7-10 days is expected based on the complexity of the site and its condition.

Better Insulation: - Our thermal insulation material is made of high quality Rigid Polyurethane Foam (PUR), considered to be one of the most efficient and high performance insulation material. High quality standard of Artifex's insulation material enables high savings in heating and cooling cost.

Stronger: - Artifex Panels can withstand compressive load of over 1 ton per square feet. On long spans it can take significant load (live as well as dead). Artifex Panels requires very less or no support structure due to its self-strength.

Lighter: - Artifex Panels are very light weight, this significantly reduces structural load requirement of buildings constructed with Artifex Panels thus saves the cost of structural construction. Also, light weight material enables construction of additional floor over existing/old buildings without change in structural load design.

Water Resistant: - Polyurethane foam (PUR) is one of the principal components of Artifex Panels which imparts it the attribute of being water resistant owing to its closed cell structure.

Fire Resistant: - Artifex Panels are certified fire-resistant panels. Polyurethane foam is a thermosetting plastic and yields no adverse effects under fire such as melting, producing burning droplets, etc.

Energy Saving: - Artifex Panels are made using strong insulation material, thus can withstand adverse temperature differences and maintain the room temperature of the enclosed space.

Why construction services?

If you're looking for a hassle free construction experience, you will love this. With Construction Services we offer expert consultation on building design and budgets before one of our specialist teams undertakes the task of constructing your home or a factory or even a small guard room whether new or an extension of existing building. Our professionals are highly skilled and complete construction jobs as per your preferred timeline, delivering a swift and satisfying experience.

Currently our Major Construction Services are available in Delhi, NCR & Gwalior only. But we also server all over India.

Construction Made Easy

Services

Regular Construction Service	Express Construction Service	Site Management Service
Our regular construction service is an answer to all your construction needs. Get unmatched construction solution delivered in an easy stress-free way.	Choose between our 7 day and 15 day express construction package to get quickest and highest quality service.	Our experts assess your needs and design your project. On site management team will provide manpower and manage site work delivering hassle free professional job.

Why construction service

Constructing your home or industry is exciting. Your dreams start taking a shape and you can make it look the way you want. But choosing the correct products, assessing loads, preparing drawings and managing labour can be a huge task. Our aim is simple, to make construction a great experience.

Great Service	Experts at Work	Expert Advice	Superior Quality
From choosing the right product and desing to a speedy and efficient job, this is a one stop solution to all your construction needs. The direct supervision of our relationship associates and professionals ensures your construction experience is a pleasure.	We stick to your budget and make sure you don't need to pay a penny more than the figure on the contract. Our sales and relationship associates are also very particular about timelines and will keep you updated every step of the way.	We provide services of qualified architects and engineers who will prepare detailed engineering drawings based on your site conditions and requirements. The drawings and project designs will be based on advice given by these experts to client.	You are assured of highest quality construction as we strictly adhere to the recommended processes of construction as per design and advice of expert architects and engineers. All our labours and contractors are trained to deliver only at the highest standard.

Consultation Process

The Consultation	The Contract	An Experts Job
<p>You can contact us by filling a form online/calling us at 011-22932540. Once that's done, we'll send a sales representative to your home. Our representatives are trained to evaluate sites, take accurate measurements and most importantly help you arrive at estimated budget. They recommend products depending on the service and budget at hand.</p>	<p>After you've decided what needs to be done, we draw up a contract that defines the scope of work, timelines for the project and method of payment. Once the terms of the contract are set you will need to sign it and make an advance payment via cheque/demand draft to our Authorized Service Provider. The nature of the contract depends on the service you need.</p>	<p>Our team can work on drawings prepared by your existing architect or engineer. Alternatively we may arrange services of external consultants like architects or engineer to prepare project drawings and structural designs in consultation with you. Now, you're set. Sit back and relax as our experts take over. First, they will procure the Artifex materials you've chosen and depute Artifex Panel's trained installers. They will also ensure that the quality of work meets our recommended guidelines and standards.</p>

Handover Time

When finished, we make sure we clean up before handing over the site to you. The job is done only after you're satisfied and put your signature on the job completion form.

We take feedback very seriously. Post completion you will be contacted by an independent agency to confirm your satisfaction and ratings on our service.
